To Whom It May Concern:

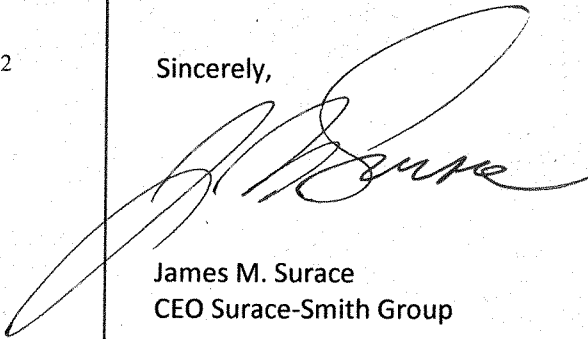

As a CEO conducting business throughout Ohio I am constantly contacted by various charity, community and philanthropic organizations to assist and contribute to their projects. None I have found more worthy than the ASAP Organization.

The most precious of assets we have as a nation is our young people...they are our children and our future leadership... and as they go, America goes. I have seen more despair, depression and confusion with this young generation than ever before in history. And I have witnessed no better or more constant and consistent remedy than what the ASAP program provides for today's schools and students.

I have witnessed countless lives changed by the words of the Speakers and the follow up this program provides. And in this world of challenged school budgets, ASAP reaches out to the concerned citizens, businesses, community and faith based organizations to provide the funding and personnel to accomplish these assemblies at little or no cost to the schools. ASAP is a united team to touch today's students providing an atmosphere conducive to encouragement, positivity, productivity and so then school excellence and achievement.

This is why I support this group and would strongly recommend them to any school wishing to effect positive change amongst the students that have been entrusted to them.

Sincerely,

James M. Surace
CEO Surace-Smith Group
